

GRANDE ARTEMIS

A New Era in 3.2m Wide-Format Printing.
Speed that drives productivity. Quality you can trust.

SABUR

SPC

Stylish Penetration Control

SPC is DGI's proprietary technology that utilizes a specially formulated "Stylish Penetration Control" liquid to enhance ink penetration, resulting in superior color uniformity and Perfect double-sided results for flags.

ARTEMIS GRANDE

Introducing ARTEMIS GRANDE

The definitive 3.2-meter direct-to-fabric printer, engineered to deliver revolutionary performance and unlock new revenue opportunities for your business.

**Unrivaled
Performance**

New benchmark
in speed and
productivity

**Intelligent
Engineering**

Smarter features for
versatility and
quality

**Economic
Advantage**

Seamless inline workflow
from printing to cutting

Revolutionary 3.2m Printing,
Grande Scale, Supreme Velocity

ARTEMIS GRANDE

Technological advancements of the ARTEMIS GRANDE

**High
Production
Speed**

200m² /h
(1/3, 360x1200
2pass)

**Printing
Resolution**

720 x
3600 dpi

**7pl Smallest
Droplet and
Variable Dots**

**Ink
Configuration**

4, 6, 8 Colors
+
Optional SPC

**Max Media
Thickness**

15mm

**Robust
Printheads**

Ricoh gen5
X
12 Printheads

Max Printing Width

3,230mm

Revolutionary 3.2m Printing,
Grande Scale, Supreme Velocity

ARTEMIS GRANDE

Performance

4 color

200 m²/h (2pass)

6, 8color

150 m²/h (3pass)

Engineered for Pure Speed

“Robust and reliable printhead for consistent performance”

**RICOH
GEN5i**

Advanced Head Array

4x3 staggered layout of 12 Ricoh Gen5 print heads maximizes print width coverage with every pass.

Linear Motor Carriage

X-axis driven by quiet, high-precision linear motor eliminates pulley replacements, ensuring consistent printing at high speeds.

Multiple Print Modes

3-Pass Mode achieves up to 150 m²/h production speed.

Revolutionary 3.2m Printing,
Grande Scale, Supreme Velocity

ARTEMIS GRANDE

Control Every Detail. Maximize Every Output.

***“Precise control across media, color, and motion
Stable performance in demanding production environments”***

Motorized Carriage Height Adjustment

Adjustable up to 15 mm
Enables stable printing on thick and challenging materials

Flexible color configuration with optional SPC

Enhanced color consistency and deeper penetration

Enhanced Media Handling

Superior feeding system ensures reliable, precise media transport for consistent print quality across entire roll.

Lower Investment

Optimized cost efficiency for faster ROI

Increased Productivity

Up to 150 m²/h maximizes ROI

Competitive Edge

No compromise on quality or features

**Revolutionary 3.2m Printing,
Grande Scale, Supreme Velocity**

ARTEMIS GRANDE

“Print on Thick and Challenging Materials”

Motorized carriage height adjustment via touch panel

Feature: Up to 15 mm clearance for thick and textured media.

Advantage: Print directly on carpets, rugs, and other challenging textiles.

Benefit: Unlock new high-margin applications in flooring and specialty textiles.

“Brilliant Color” *Vibrancy and Flexibility in Every Drop*

Feature

Flexible ink configurations with up to **8 colors**, including Light Cyan, Light Magenta, Orange and Blue, plus optional Stylish Penetration Liquid.

Advantage

Achieve exceptionally wide color gamut for photorealistic quality, smooth gradients, and precise brand color matching.

A New Spectrum of Applications

***“Built for high-volume soft signage, including flags and banners
Expand into home textiles and specialty applications with one system”***

Soft Signage & Display Graphics

High-speed production for soft signage and display graphics
Wide 3.2 m printing for impactful large-format output

Home & Technical Textiles

Supports thick materials up to 15 mm
Unlock new applications in home décor and specialty textiles

**Revolutionary 3.2m Printing,
Grande Scale, Supreme Velocity**

ARTEMIS GRANDE

Built for Real Production Environments

“Stable, efficient, and easy to operate”

- Ergonomic layout for intuitive operation
- Accessible design for simplified maintenance
- Stable structure for continuous production

ARTEMIS GRANDE

Main key features

Heavy-duty, long-lasting printhead

To ensure high-resolution printing, the Ricoh Gen5 printhead is equipped with 1280 nozzles, enabling it to produce droplets as small as 7pl.

Dedicated Waveform

The dedicated waveform, developed by DGI, enables us to respond to customers' demands for quality graphics and design in various ways.

Advanced Cleaning System

The entire printhead can be wiped clean with a single blade stroke, ensuring optimal maintenance efficiency.

Mist Removal in Main Body & Head Carriage

Dual dust removal systems prevent contamination of both the media and peripherals by effectively removing ink mist and dust generated during printing.

Head Collision Protection System

Bi-directional anti-collision sensors are located on both the left and right sides of the carriage to detect and prevent potential damage.

Air Circulation and Purification System

Using electromagnetic adsorption technology, effectively removes fine oil mist for a cleaner working environment.

Revolutionary 3.2m Printing,
Grande Scale, Supreme Velocity

ARTEMIS GRANDE

Main key features

Dual Dryer System (Front & Rear)

Dual heaters are arranged in a 2-stage front and rear configuration to achieve powerful and consistent drying performance.

Safety Rope Switch

For maximum operator safety, emergency stop rope switches are located at both the front and rear of the machine.

Linear Motor & Metal Encoder

The application of a high-precision linear motor and metal encoder scale provides superior stability and accurate output.

Supports media up to 15 mm thickness

The carriage height can be adjusted along the Z-axis to accommodate various media thicknesses (up to 15mm).

Fixation + Cutter(Optional)

Integrated inline cutter installed on fixation unit
→ Enables efficient post-processing without additional equipment
